

USE AND CARE PAINTED FINISHES

Dust is very abrasive and can scratch the finish if wiped clean with a dry cloth. To avoid scratching, use a feather, lambs-wool, micro-fiber or static duster. All regular cleaning should be done with a soft, slightly damp, 100% lint-free or micro-fiber cloth. For general cleaning, use only warm, clean, tap water or a mild detergent. Avoid excess rubbing and always wipe with the grain direction of the wood surface. Do not allow any standing or pooling water on cabinet surfaces. It is important to remove any oil, grease or food residue as soon as possible. Excessive exposure to or build-up of items such as, but not limited to: vinegar, citrus juice, ketchup, coffee, tobacco, olive oil, mustard and mayonnaise may stain or damage the finish. The use of spray, liquid, or paste cleaners and waxes are not necessary, nor are they recommended with your finished cabinetry.

USE AND CARE MILK - PAINTED FINISHES

Dust is very abrasive and can scratch the finish if wiped clean with a dry cloth. To avoid scratching, use a feather, lambs-wool, micro-fiber or static duster. All regular cleaning should be done with a soft, slightly damp, 100% lint-free or micro-fiber cloth. For general cleaning, use only warm, clean, tap water or a mild detergent. Avoid excess rubbing and always wipe with the grain direction of the wood surface. Do not allow any standing or pooling water on cabinet surfaces. It is important to remove any oil, grease or food residue as soon as possible. Excessive exposure to or build-up of items such as, but not limited to: vinegar, citrus juice, ketchup, coffee, tobacco, olive oil, mustard and mayonnaise may stain or damage the finish. The use of spray, liquid, or paste cleaners and waxes are not necessary, nor are they recommended with your finished cabinetry.

USE AND CARE POLYESTER FINISHES

Dust is very abrasive and can scratch the finish if wiped clean with a dry cloth. To avoid scratching, use a feather, lambs-wool, micro-fiber or static duster. All regular cleaning should be done with a soft, slightly damp, 100% lint-free or micro-fiber cloth. For general cleaning, use only warm, clean, tap water or a mild detergent. Avoid excess rubbing. Do not allow any standing or pooling water on cabinet surfaces. It is important to remove any oil, grease, or food residue as soon as possible. Excessive exposure to or build-up of items such as, but not limited to: vinegar, citrus juice, ketchup, coffee, tobacco, olive oil, mustard, and mayonnaise may stain or damage the finish.

For polishing and removal of small scratches, use either Wizards® Shine Master™ or Wizards® Mist-N-Shine™. As with all cleaning and polishing products, follow manufacture's directions closely for proper results.

USE AND CARE STAINLESS STEEL

As with our wood cabinetry, all cleaning and polishing of stainless steel should be done with a soft, 100% lint-free or micro-fiber cloth. Fingerprints are the most common item to be cleaned from stainless steel surfaces. These can be easily removed with any household brand window and glass cleaner. Heavier dirt or stains can be removed with a non-abrasive stainless steel cleaner or polish. If using a cleaner or polish, be sure to test a small, inconspicuous area first and always wipe with the grain direction on the stainless steel.

USE AND CARE BLACKENED STAINLESS

Dust is very abrasive and can scratch the finish if wiped clean with a dry cloth. To avoid scratching, use a feather, lambs-wool, micro-fiber or static duster. All regular cleaning should be done with a soft, slightly damp, 100% lint-free or micro-fiber cloth. For general cleaning, use only warm, clean, tap water or a mild detergent. Avoid excess rubbing and always wipe with the grain direction of the surface. Do not allow any standing or pooling water on cabinet surfaces. It is important to remove any oil, grease or food residue as soon as possible. Excessive exposure to or build-up of items such as, but not limited to: vinegar, citrus juice, ketchup, coffee, tobacco, olive oil, mustard and mayonnaise may stain or damage the finish. The use of spray, liquid, or paste cleaners and waxes are not necessary, nor are they recommended with your finished cabinetry.

USE AND CARE OILED WOOD PRODUCTS

Some wood products such as butcher-block tabletops and cutting boards are specified with a natural oil finish. To ensure proper care, this type of finish should be reapplied every three to six months, depending on use. We recommend Watco® Danish Oil or any outdoor-grade penetrating oil and sealant. Follow the manufacturers directions for product application and disposal.

USE AND CARE GLASS AND MIRROR

Our recommendation is to use alcohol-based or “ammonia free” glass cleaners for your decorative glass and mirror products. Alcohol-based cleaners lessen the risk of etching the glass surface and damaging the backs of mirrored items. This type of damage may occur with continued use and exposure to ammonia-based glass cleaners. The Sprayway Company® has an extensive offering of “ammonia free” glass and mirror cleaning products.

U S E A N D C A R E D E C O R A T I V E H A R D W A R E

Cleaning of decorative hardware should be done with a soft, 100% lint-free or micro-fiber cloth. A slightly damp cloth with mild detergent is all that is needed for general cleaning. Use of abrasive cleaners or polishes may damage the finish and protective hardware coating.
