OUTDOOR CABINETRY

BY PREMIER

Weatherproof, Durable, Beautifully Crafted

We love to spend time outdoors. As a result, our homes are expanding to include outdoor living and entertaining spaces. Function has become an important aspect of those spaces and kitchens are part of the plan.

Premier's Outdoor Cabinetry Collection is unmatched in the industry. Smartly engineered and beautifully crafted, our outdoor cabinetry boasts a waterproof, weathertight case. And, while our gasket seal insures product performance in all types of weather, our selection of wood, metal, and powercoat options provide a style choice for every client.

POWDERCOAT & WOOD OPTIONS

In addition to our standard offering, other powdercoat and wood colors are available.

- Sky White
- Peanut
- Almond
- Hazelnut
- Clay
- Putty
- Fog
- Moss
- Caribbean Blue

FEATURES

Premier's high-performance cabinetry includes features and interior options not found in other outdoor products. Here are just a few of the things that set us apart.

Gasket Seal

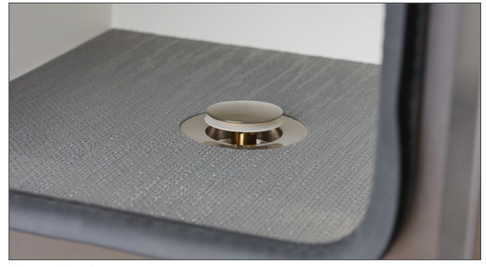
Like a car door, the gasket keeps the cabinet interior completely dry and free from insects and other outdoor pests.

Integrated Outlets

A duplex outlet box with a gasket seal cover is available. The outlet is installed on 4" wide end panels.

Earth Magnet

A high-powered Earth Magnet keeps doors and drawers tightly closed to ensure a completely watertight seal.

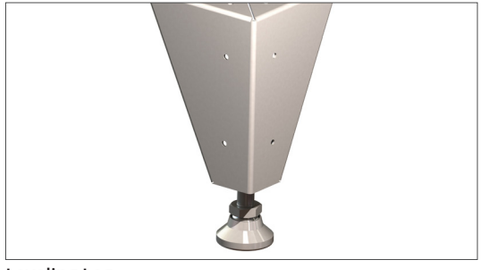


Floor Drain

A push-to-open floor drain is a modification that can be made to your cabinet. The drain sits flush when closed.

Pivot Hinge

A high quality, stainless steel pivot hinge allows the door to swing freely, opening to 180°.



Leveling Leg

An adjustable leveling leg and swivel foot allows for easy installation on stone and other uneven surfaces.

Propane Storage

Mounted on full-extension heavy duty drawer slides, the propane tank is secure, easily accessible, and beautifully concealed.

Roll-out Shelf

Roll-out shelves consist of a powder-coated metal drawer box on full extension, soft close, under mount drawer track.

MATERIAL COMBINATIONS & TEXTURES

Material combinations are one of the style details that make Premier Outdoor Cabinetry unique.
Wood and stainless, wood and powdercoat, brushed and polished metal are all stunning design options.

Textured Powdercoat

Premier offers textured powdercoat in Gray Slate Texture, available on all stainless doors and on the stainless frame of wood doors. This fine texture with matte finish creates an elegant look.

Polished and Brushed Stainless Combination

A slant edge detail in polished stainless steel, brings a sophisticated sparkle to this door and drawer style. Creating subtle contrast is the brushed stainless steel center panel.

WHY YOU'LL LOVE PREMIER OUTDOOR PRODUCTS

SO MANY SOLUTIONS

Pre-engineered products are ready to order right out of the book. Choose from our standard cabinet sizes, wood, stainless or powder-coat finishes, and various door options to create unlimited combinations of style and design. And of course, in the tradition of Premier, we can always do custom cabinetry!

SMARTLY ENGINEERED

Materials and design combine to create a one-of-a-kind cabinet. A waterproof thermoplastic cabinet case is married to a stainless-steel face frame. The frame includes a continuous gasket and when the door is closed, it creates a watertight seal. The result is a product that is watertight, weatherproof, insect and varmint proof, easy to clean and resistant to physical abuse. Driving wind and rain - no problem!

STATE-OF-THE-ART-MATERIALS

Stainless Steel, Powder-coat Colors and Textures, various Wood Species and a variety of Stainless Steel Decorative Hardware options are included as design choices offered by Premier.

SPECIALTY CABINETS

It's not just about the grill any more. Today's outdoor kitchens also incorporate power burners, warming drawers and even a microwave. For spaces that don't have natural gas, we have a specially designed propane tank cabinet. With solutions for all your appliance and component needs, Premier Outdoor Cabinetry is the perfect choice.

BEAUTIFULLY MADE AND DURABLE

Crafted in the tradition of fine cabinet making, Premier's Outdoor Cabinet Collection brings a sophistication and performance that is unmatched in the industry, while meeting the demands of an outside environment.
